Hi Laura,

Dave Cooper and I met State Legislator Angela Ow at the 2300 North/NWOD Canal location at about 3:40 pm today.

She was accompanied by our Division Director Brent Everett and two of our Branch Managers. They only stayed for about 20 minutes as they were running late. As it happens, Hans Millican, one of these Managers, worked for ERM a few years ago and worked on the NWOD with Galen and EarthFax. He came to UDEQ about 4 years ago - shortly after the completion of the earlier Dredging work. We spent some time showing the group the two excavators, a bunch of the black residual sediments, there was some free product in the water, etc. Dave explained the pumping system and the SPA and haul to PacWest. A nice, short visit. Angela was impressed.

All for now,

Liz

Subject: NWOD Tour w/ Legislator

Laura,

I've just been told by our CERCLA Manager, Duane Mortensen, that the tour may happen tomorrow about early afternoon. Apparently, they will just show up at the 2300 North street area, where I will be, and let them observe any excavation that is happening. Again, I've been told the Legislator's name is "Angela O". This is all I have presently, except there is a group of people touring with "them". I believe it is only for our Division, so it will include Brent Everett (our Division Director), Duane Mortensen (CERCLA Manager), possibly Therron Blatter (LUST/UST Branch manager) and Hans Millican, our Construction Section Manager. They are looking at examples of excavation remediation and I was told they will also be going to some LUST sites in Murray/Midvale. I will certainly inform them this is SLC's Working Group and Project. I will keep you posted tomorrow, if you'd like, even tho it is your day off.

Liz
